EXPERIENCES

BEPOZ

Melbourne, Australia

- **Product Manager**

Nov 2018 - Present

At the completion CRM project, I was offered to the role of product manager to work on the company's second line of products (e-commerce & loyalty mobile app) for restaurants, pubs and universities.

My day-to-day comprises many tasks of the development process, including scoping features, product logic, task prioritization, testing, technical support and ensuring DevOps practices.

My role also included working with newly signed customers in understanding their business needs, the scope and delivery of a functional solution, and providing technical training.

- **System Administrator & Project Manager**

Nov 2017 - Nov 2018

Contracted to manage the implementation of software that is used as CRM, ticketing system, help desk, quoting, billing, and procurement (Connectwise).

During the execution of this project, I had the chance to apply my knowledge in business process analysis, change management and business strategies that helped the organization improve its efficiency and processes.

All processes including setup, configuration, documentation and training were successfully completed.

Y&G Construction

Melbourne, Australia

- **Labour/Team Leader**

Jan 2017 - Oct 2017

Responsible for site opening, daily reports, task distribution and team management. As well as, excavator operation, gardening, site maintenance, general cleaning, painting and concreting.

CATERPILLAR INC.

Piracicaba, Brazil

- **Supply Chain Analyst**

Jan 2014 - Nov 2016

At the completion of my internship, I was then hired to continue on the same team, now figuring as a Supply Chain Analyst. My main tasks were:

- being responsible for the acquisition of materials and inventory control.
- responsible for production balance and distribution.
- successfully achieving inventory reduction and surplus elimination.

In addition, I developed reports and internal systems for my business unit using MS Access.

- **Intern**

Out 2012 - Dez 2013

Selected to be part of Caterpillar Brazil's biggest project at that time, I was an active participant in the planning and execution of Caterpillar's new facility. My tasks were:

- understanding of the remanufacturing process and creation of work instructions.
- the creation of the manufacturing process, later implemented by the facility.
- analysis of product drawings used for the creation of the bill of materials and the release of parts for production.

LOOP INDUSTRIA & COMERCIO.

Limeira, Brazil

- **Quality Analyst**

Mar 2010 - Sep 2012

As an analyst, I became the main responsible for the company QMS. Creating and reviewing procedures, work instructions and general documentation. During this period I performed as an internal auditor and helped the company in getting ISO 9001:2008 certified. Other tasks included technical visits and customer service.

- **Quality Auditor**

2009

Apr 2008 - Aug

My role as a quality auditor was to ensure a thorough inspection of the final product, delivering quality to the customer. My tasks were: technical inspection, measurement and analysis of the product, performing sample testing and approving product to be dispatched.
